The Microscope includes a stroboscope, bright light and filters, and used to observe the corneal endothelium. The Microscope uses the stroboscope to form a long-term flash to improve the resolution of endothelial images. The microscope can be used to photograph the endothelium, and capture images of the corneal endothelium under a microscope. The magnifying lens, the adjustable light source and the frame can be adjusted to meet the user's eyesight. As it allows the user to view the corneal endothelium, it can be used as a blood pressure meter for home use. The brightness, color filter and manual adjustment of the image are controlled by the user to obtain the best image. The size of the digital camera can be adjusted to fit the size of the image. Strobe Light, Bright light, Color filter and frame control. Adjustable brightness, adjustable color filter and adjusting frame. Digital camera can be adjusted to fit the size of the image. Digital camera can be adjusted to fit the size of the image.
